In addition to offering a wide-range of standard profiles, Sand Profile specializes in problem-solving, which can be implemented expeditiously and expertly by our own development and tooling departments.

We set ourselves high standards to ensure consistent top-quality for our products. In addition to regular certification by independent bodies, in accordance with international standards, we live by our philosophy "added value through value appreciation". Through continuous internal assessment and self-analysis of all company divisions and work processes, Sand Profile unremittingly achieves to make perfections down to the last company segment. This improves the quality of our products as well as enhances occupational safety and increases cost efficiency.
